## Tiktok foryoupage videos

TikTok is the entertainment app that has Snapchat innovating to keep up, and even inspires the creation of a new phone. Somewhat reminiscent of the now defunct Vine, the free app focuses on short, musical videos created by users. If you're just in for lolz, you can scroll through millions of videos uploaded by other users, or you can get creative and make your own. How to get started with TikTok. Getting started If you're a video connoisseur, but not necessarily a creator, it's easy to get started. Simply download TikTok on iOS and Android. Then open the app. On the main screen will be a popular video to watch. If you don't like the offer, swipe up to go to the next video. You can also rate, comment on, and share the video using the icons on the right side of the screen. You can also browse popular videos and keywords or hashtags to find videos you like by tapping the Search icon at the bottom of the screen. Do you feel creative? Tap the Me icon at the bottom right of the screen, and then create an account using the on-screen directions. Now you can create videos by tapping the + icon on the mescreen. Also on me, the screen lets you see how many likes and followers you have. Creating a video All videos on TikTok are 15-60 seconds long (you can choose the time limit by selecting the setting under the recording button), so you might want to schedule your video a little before you start. When you're ready, tap the + icon on the Me screen. From there, the video recording screen will pop up. You might notice that other than the red recording button, there are a lot of other icons. Here's what they do: Effects icon: This icon is a square smiley face on the left bottom side of the screen. Tap on and choose from a menu of special effects that can be used in your video, like glittering snow, black and white movie effects, and interactive effects that change as your body moves during filming. Photo Templates: This option, available under the record button, allows you to upload your photos to a creative video gallery, complete with music. Select your template by swiping left, and then tap the Select Pictures button to upload your photos. Add a sound: At the top of the screen is the Add a Sound option. Tap it to find a song you can add to your video. You can also use this option to save songs for later videos. Do you have no idea which song you want to use? Tap the Experience a sound button in the middle of the screen Add a sound for inspiration. Flip: Flip does just what it says, it turns the camera between forward-facing and rear-facing. Speed: The Speed icon allows you to control how fast or slow your video is. Jack it at high speed or slow it down to maximize laughs. Beauty: This icon allows you to add a beauty filter to your video. Tap the icon to turn it on and on it again to turn it off. Filters: The Filters icon lets you add filters to your video, just like any other video app. Timer: Want a shorter video? Den Den allows you to customize how long your video should be. Use the slider to select how many seconds the video will record before you automatically turn off. When you're done filming, tap the red check mark. You will then be taken to an editing screen. Here you can add filters, stickers, switch out effects and sounds, and add text to the video. After you edit, tap the Next button. On this new screen, you can describe your video, add hashtags, tag friends, turn off comments, share the post, change privacy settings, and save it as a draft. Advanced tricks Once you're used to the basics, you can get more creative. For example, there is a Duet feature where you can combine your video with friends. All you have to do is get your friend to send you their video. On the Inbox screen, open it, and then tap the Share icon and the duet icon. If you are into special effects, you will probably like the green screen tool. Select the Effects icon on the video screen, and tap the icon #greenscreen the Trend section. From there, you can add any image from your phone that you can use as a background in your video. One user used the green screen effect to pose with a shark, for example. How to change the protection of your videos Sometimes you don't want people to watch your videos, especially when you're just getting started. You can change who can watch each video pretty easily. For videos you've already uploaded, tap the Share icon, and then Who can watch this video and choose Private. To choose who can see it before you post the video, simply choose who can watch this video, and then tap Private on the storage and sharing screen when you post the video. If you are curious about TikTok privacy and protection here is all you need to know. Editors' Recommendations TikTok has a ton of video content, and sometimes you can download TikTok videos to your devices. When you download videos from TikTok, you can watch your favorite content even if you're not connected to the Internet. It also allows you to share these files with others through your preferred sharing methods. There are different ways to download TikTok videos on multiple devices. Download TikTok videos on Android If you're using an Android device, you have two ways to download TikTok videos on your phone or tablet. Using the TikTok App itself One way to download TikTok videos on Android is to use the official TikTok app. This method works for all the videos where the creator has enabled download. Start the TikTok app on your phone. Find the video you want to download. You will see a few options on the right sidebar. Tap the option that has an arrow icon (that's for sharing the video). On the following screen, you'll have several ways to share the selected video. Because you want to download this TikTok video, tap Save video. Wait for the video to download to your device. You can see the direct progress on your You'll get a menu where you can share your video. Tap Cancel because your video is now downloaded on your device. Open the Gallery app and you'll find your selected TikTok video downloaded there. Use WhatsApp Some videos on TikTok do not offer the download feature. But there is a solution to download these TikTok videos using WhatsApp. Start WhatsApp on your phone. Tap three dots in the upper-right corner and select New Group. Open the newly created group and tap its name at the top. Locate the contact you added, tap it, and choose Remove. This will remove them from the group. Start TikTok on your device. Play the video you want to download. Then tap the part icon in the right sidebar. On the Share with menu, tap WhatsApp. Select the newly created group to share the TikTok video with. You can find your TikTok video there. Download TikTok Videos On iPhone iPhone users have three different ways to download TikTok videos. This includes downloading videos that cannot be downloaded. Using the official TikTok app If the download is enabled for the video you want to download, you can use the TikTok app to save it to your phone. Open the TikTok app on your iPhone.Play the video you want to download. Tap the Share icon on the menu on the right. Select the Save Video option. Ignore the Share To menu that appears on the screen, and tap Done to get rid of it. The downloaded TikTok video will be available in the Photos app on your iPhone.A quick way to download the video is to tap and hold the video and select Save Video. This does not require you to open the Share menu. Using Instagram If you come across a video that's downloaded disabled for it, you can still download it to your phone using the Instagram app. Make sure Instagram is installed on your iPhone and that you're signed in to your account. Open the TikTok app on your iPhone.Find the video you want to download. Tap the part icon in the right sidebar. Choose Instagram from the Share With menu to share your video on Instagram. It will not actually be published in your profile. Instagram post mode opens. Tap Cancel in the upper-left corner because you don't want to post anything. Open the Photos app on your iPhone and you'll find your selected TikTok video downloaded there. Using Total Files If you're not using Instagram and you want to download a disabled TikTok video to your iPhone, you can use the Total files file management app to do so. Open the App Store on your iPhone, search for total files, and install it. Start the TikTok app on your iPhone.Select the video you want to download. Tap the part icon in the right sidebar. Select Copy Link on the following screen to copy the link to the selected video. Open the Total Files app on your iPhone.Tap the web icon in the lower-right corner. Press and hold the address bar at the top, and choose Paste. Then tap Go at the bottom. Play on the following screen. Tap the video when it starts playing and you'll get a prompt. Tap the green fly icon. In total, you'll be asked where you want to save the video. Select a destination and tap Done. The video will be downloaded and available to view in total files app. Downloading TikTok videos on a computer Downloading TikTok videos on a computer does not require you to install any apps. All you need is access to the link to your video, and you can download and save the video to your Windows or Mac computer. Using the page source code You can access the source code of the TikTok video and get the direct video transfer link from there. Use the Copy Link feature in TikTok on your phone to copy the video link and send it to your computer. Open the link in a browser on your computer. Right-click the video and select Check. You can see the download link as highlighted below. Open it on a new tab. Right-click the video and choose Save Video As. Using an online downloader There are many online TikTok downloaders that can help you download TikTok videos to your computers. Go over to musicallydown online download website. Insert the TikTok video link and click Download. On the following screen, click Download MP4 Now. What is your favorite way to download TikTok videos on your devices? Let us know in the comments below. Below.
